Cyber Resilience Toolkit (CRT)

Product Terms

Software Licence & Product Terms
Version 1.0
Last updated: 29 September 2026

These Product Terms apply to your purchase, download and use of the Cyber Resilience Toolkit (CRT), including the CRT Desktop application, supplied source files, CRT Curated Content, documentation and associated digital materials.
CRT is developed and supplied by **Blake Media Ltd**, United Kingdom.
By purchasing or using CRT, you agree to these Product Terms. Nothing in these terms affects any statutory rights you may have as a consumer.

1. About CRT

Cyber Resilience Toolkit is a decision-support environment for investigating cyber resilience and developing resilience programmes.
CRT brings together frameworks, obligations, controls, organisational context, dependencies, evidence and programme development within a structured working environment.
CRT is designed to assist investigation, organisation, construction and review. It does not replace professional judgement.

2. Licence

Your purchase grants you a non-exclusive, non-transferable licence to install and use the supplied version of CRT for your own personal or internal business purposes.
You may use the supplied application and documentation on devices that you own or control, subject to these terms.
Your purchase does not transfer ownership of CRT, its underlying intellectual property, Blake Wiltshire or Blake Media Ltd branding, or Blake Media Ltd proprietary content to you.

3. Source Files

CRT may include source files for users who prefer to work directly with the underlying software environment.

You may inspect, run and modify the supplied proprietary source files for your own personal or internal business use.

Unless separately authorised in writing, you may not:

- redistribute, publish, sublicense or resell the supplied proprietary source files;
- distribute modified versions of CRT or its proprietary source files;
- offer CRT, or a substantially reproduced version of CRT, as your own product or service;
- remove or misrepresent copyright, attribution or ownership notices; or
- use Blake Wiltshire or Blake Media Ltd names, branding or marks in a way that suggests endorsement or ownership.

CRT incorporates or may operate with third-party and open-source software. Those components remain subject to their respective licences, which take precedence in relation to those components.

4. CRT Curated Content

CRT Curated Content comprises Blake Wiltshire-maintained frameworks, controls, obligations and supporting catalogue material made available for use within CRT.

Curated Content is provided to support structured investigation. It should not be assumed to be exhaustive, continuously updated, or applicable to every organisation, system, jurisdiction or circumstance.

Frameworks, standards, regulatory requirements and other external material may change independently of CRT. You remain responsible for determining which requirements and sources are applicable to your circumstances and for consulting authoritative current sources where necessary.

5. Organisation-Specific Content

CRT allows you to create, import and maintain organisation-specific or user-developed context, including frameworks, obligations, catalogues and related working material.

You are responsible for the accuracy, suitability and lawful use of information that you add to CRT.

You should maintain appropriate backups of important user-created information. CRT should not be treated as the sole repository for information that is operationally, legally or commercially critical.

6. AI-Assisted Capabilities

CRT may enable context to be prepared for or used with artificial intelligence systems.

AI-assisted outputs may be incomplete, inaccurate or inappropriate for a particular situation. They should be examined alongside the underlying evidence, organisational context and relevant authoritative sources.

AI assistance does not transfer responsibility for decisions, actions, security controls, compliance determinations or resilience programmes from the user.

Where third-party AI services are used, their own terms, privacy practices, availability and technical limitations may also apply.

7. Decision-Support Boundary

CRT is a **decision-support environment**.

It does not provide cybersecurity, legal, regulatory, compliance or other professional advice.

Information, classifications, frameworks, controls, analytical perspectives, generated context and AI-assisted outputs provided through CRT should not be treated as a determination that an organisation, system, programme or activity is secure, resilient or compliant.

Use of CRT does not establish certification, regulatory compliance or conformity with any framework or standard.

Professional or specialist advice should be obtained where appropriate to the circumstances.

8. Third-Party Material and Services

CRT may reference or interact with third-party frameworks, standards, software, services, data or other resources.

Those materials and services remain subject to their respective owners' terms, licences and availability.

References within CRT do not imply ownership, sponsorship or endorsement by Blake Media Ltd unless expressly stated.

9. Application and Content Updates

Application releases and CRT Curated Content may be made available from time to time.

Unless expressly stated otherwise, your purchase does not guarantee:

- future major versions of CRT;
- perpetual application updates;
- a particular frequency of CRT Curated Content releases;
- continued availability of a particular third-party integration or dependency; or
- individual technical, cybersecurity, compliance or professional support.

A future product or major version may be offered separately.

10. System Compatibility

You are responsible for checking the stated system requirements and compatibility information before installing CRT.

Operating systems, Python packages, third-party dependencies and external services can change independently of CRT and may affect future compatibility.

Where Blake Media Ltd provides compatibility information, it describes the supported or tested environment at the relevant time and is not a guarantee that CRT will operate indefinitely on subsequently modified systems.

11. Intellectual Property

Except for third-party material and components subject to their own rights and licences, CRT, its proprietary source files, documentation, original structures, presentation and associated Blake Media Ltd content are protected by applicable intellectual-property law.

All rights not expressly granted under these Product Terms are reserved.

12. Acceptable Use

You must not use CRT in a way that is unlawful or infringes the rights of another person.

You must not misrepresent CRT-generated or CRT-structured material as certification, regulatory approval, professional advice or an assurance issued by Blake Media Ltd.

13. Availability

CRT is supplied as digital content for local use.

Software inevitably operates within changing technical environments. Features may depend upon operating-system behaviour, third-party libraries, external services or other components outside Blake Media Ltd.'s control.

Nothing in this section limits statutory rights that cannot lawfully be excluded or restricted.

14. Liability

Nothing in these Product Terms excludes or restricts liability where doing so would be unlawful, including liability that cannot lawfully be excluded or restricted under applicable consumer law.

Subject to those rights and to the extent permitted by law, Blake Media Ltd is not responsible for losses arising solely from decisions or actions taken by a user in reliance upon analytical, organisational, reference or AI-assisted material produced or assembled through CRT.

You remain responsible for evaluating evidence and determining appropriate technical, organisational, legal, regulatory and operational action.

CRT is not intended to operate as an autonomous security, compliance or incident-response authority.

15. Consumer Rights and Digital Content

If you purchase CRT as a consumer, applicable law gives you rights in relation to digital content, including requirements concerning quality, fitness for purpose where applicable, and conformity with its description.

Nothing in these Product Terms excludes or restricts those statutory rights.

Where digital content is supplied immediately following purchase, any cancellation rights and associated consent requirements are governed by applicable consumer law and the purchasing process through which CRT is supplied.

16. Changes to These Terms

These Product Terms may be updated from time to time, for example to reflect changes to CRT, distribution arrangements or applicable law.

The terms applicable to a purchase will not retrospectively remove statutory or contractual rights already acquired by the customer.

17. Governing Law

These Product Terms are governed by the laws applicable to Blake Media Ltd in the United Kingdom, subject to any mandatory rights or protections that apply to you under the law of your place of residence.

18. Contact
